FOREWORD

The Bureau of Economic and Business Research published two past volumes of economic data about Illinois. The *Illinois Economic Abstract*, under the direction of Professor Ruth A. Birdzell, appeared in 1977 followed by *Illinois Economic Statistics 1981*. These volumes have been well received and useful to business, government, students, and the public. This effort is part of the ongoing mission of service that the University at large, and the Bureau in particular, fulfill for the citizens of Illinois. Requests for assistance and advice from the Bureau regarding data collection are received from a variety of sources: faculty and staff of the University and other institutions of higher education; newspapers and other publishers; state and local government agencies; and business users seeking marketing or location information.

To satisfy these demands, the Bureau issues several publications. The bimonthly *Illinois Business Review* has recently been enhanced to dispense more historical and forecast statistics concerning Illinois. The annual *Illinois Economic Outlook* gives readers a picture of the state economy for the coming year.

With the publication of this volume, the Bureau makes data available to the general public in a machine-readable format for the first time. The explosion in desktop computing has made this advancement both possible and desirable. Copies of this book can be purchased on diskette for users with heavier data analysis demands. For information contact the Bureau.

In the tables which follow, we present statistics on income and expenses, government payments, taxes, banking, prices, establishments, employment and unemployment, payroll, hours worked, wages and earnings, construction, population, and a variety of other categories. We have abstracted this data from both federal and state sources in an attempt to tabulate the statistics most pertinent to users in Illinois. If additional information is desired, the sources listed at the beginning of each section may prove useful.

This book was prepared based on extensive effort by David Mandy who was a research assistant in the Bureau. He is now an Assistant Professor at the University of Tennessee. Alice Waldoff was responsible for the publication process while research assistants, David Lee, Deborah Mustell, Reed Olsen, Carla Tighe, and Larry E. White, each contributed their personal skills in specific areas covered in this book. We are grateful to all for their help.

We appreciate comments concerning this data book so that we can continue to improve our publications. Please let us know if you have any suggestions.

SECTION 1
PERSONAL INCOME

Personal income is the income received from all sources by the residents of an area. This section presents data on the personal income and earnings of various sectors of the Illinois economy. Earnings differ from personal income in that they include only labor income. Hence, income sources such as interest and dividends are excluded from earnings. The categories presented are the major industries as well as the government sector. These data have been extracted from the series "personal income by major source and earnings by major industry," published by the Bureau of Economic Analysis, US Department of Commerce.

The footnotes for this section are:

[1]	1929-74 based on 1967 SIC. 1975-84 based on 1972 SIC.
[8]	Other—wages and salaries of US residents working for international organizations in the US
(D)	Not shown to avoid disclosure of confidential information. Estimate is included in totals.
E	The estimate shown here constitutes the major portion of the true estimate.
(L)	Less than $50,000. Estimates are included in totals.
*	Illinois portion only.
(NA)	Data not available.

SECTION 2
TRANSFER PAYMENTS

This section presents data on transfer payments made between entities in the economy. These payments can take many forms, from federal social security payments to certain business payments to individuals. Transfer payments are a component of personal income, but are not included in earnings. These data have been extracted from the series "transfer payments," published by the Bureau of Economic Analysis, US Department of Commerce.

The footnotes for this section are:

[1] Includes temporary disability payments, Panama Canal construction annuity payments, and black lung payments.

[9] Includes state and local government payments for foster home care supervised by private agencies, state and local government educational assistance payments to nonprofit institutions and other state and local government payments to nonprofit institutions.

(L) Less than $50,000. Estimates are included in totals.

* Illinois portion only.

(NA) Data not available.

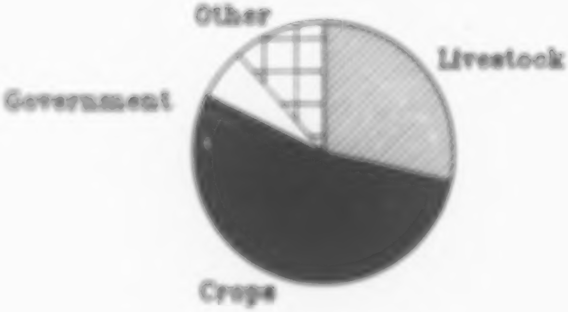
Expenses



Revenues

SECTION 3
FARM INCOME

This section presents data on the major components of farm income and expenditures in Illinois. Categories include income from sales made by farmers as well as government payments, and expenditures for feed, livestock, seed, fertilizer, and other items. These data were extracted from the series "farm income and expenditures," published by the Bureau of Economic Analysis, US Department of Commerce.

The footnotes for this section are:

(L) Less than $50,000. Estimates are included in totals.

(NA) Data not available.

* Illinois portion only.

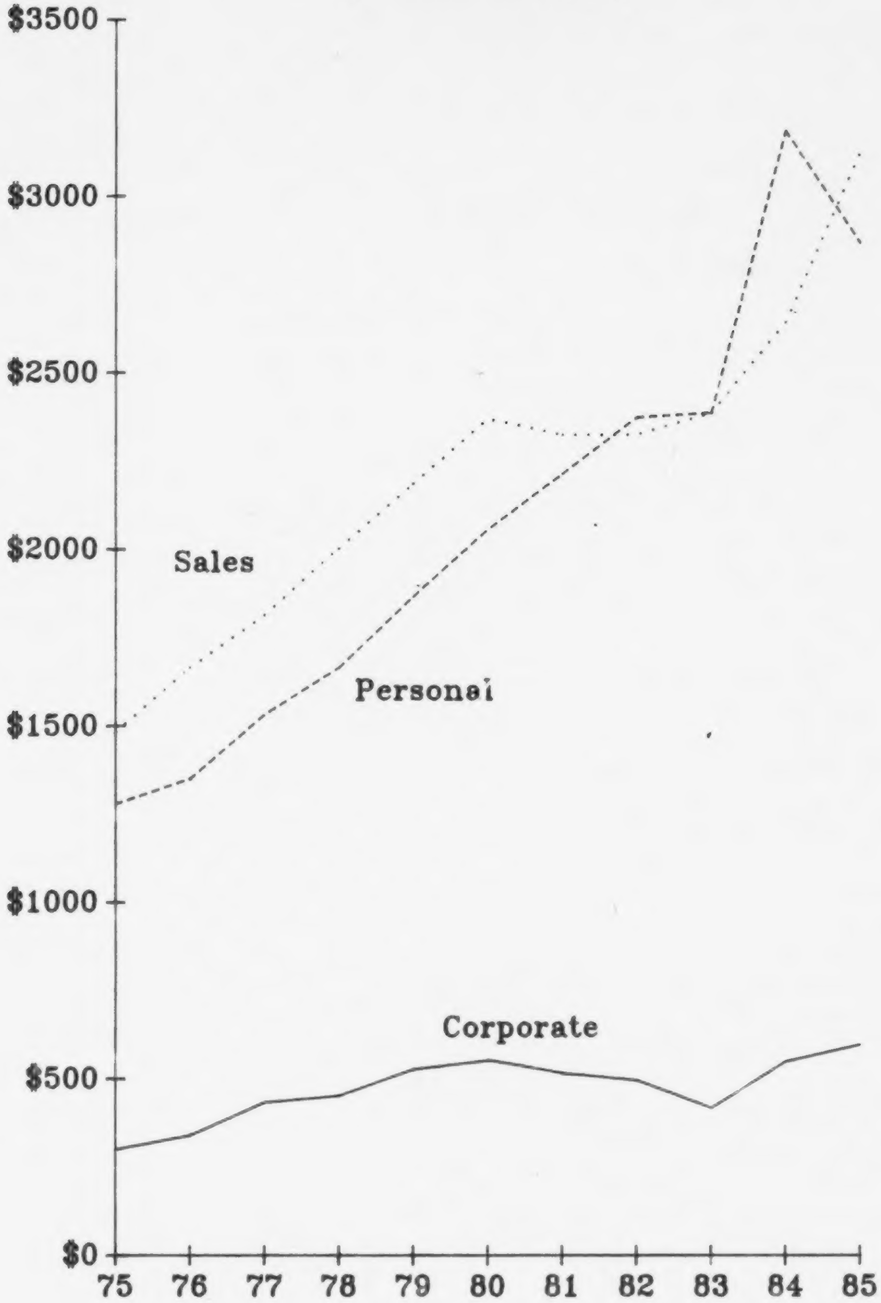
($ millions)



SECTION 4
STATE TAXES, BANKING, AND PRICES

This section presents data on retail sales, Illinois state tax receipts, selected balance sheet components of banks in Illinois, and price indexes. Tax receipts are listed for the major categories of the state's general fund. These data were obtained from the State of Illinois, Comptroller's Office. Sales were estimated from sales tax receipts by the Bureau of Economic and Business Research, University of Illinois. The sales tax receipts were obtained from the Illinois Department of Revenue. Bank balance sheet information was obtained from the Board of Governors of the Federal Reserve System. The consumer price indexes were obtained from the monthly *CPI Detailed Report* published by the Bureau of Labor Statistics, US Department of Labor. These documents should be consulted for definitions and methodology.

The footnotes for this section are:

[1] BEBR estimate based on sales tax receipts.

[2] Includes only insured commercial banks in Illinois.

[3] Includes the assets of foreign offices for banks with facilities abroad.

[4] Market values are reported for all securities categories.

[5] For banks with less than $100 million in total assets, this number includes the market value of all other US government agency and corporate obligations not held in trading accounts.

[6] Includes all loans to US and non-US addresses.

[7] Includes all loans, not secured by real estate, to individuals for medical expenses, personal taxes, vacations, consolidation of nonbusiness debts; for the purchase of private passenger automobiles, household appliances, furniture, trailers, boats, mobile homes, etc. Includes credit extended through credit card plans, bank check credit, other revolving credit, and special overdraft credit.

[8] Calculated by subtracting federal funds purchased from federal funds sold.

[9] Includes the liabilities of foreign offices for banks with facilities abroad.

[10] All deposit categories include deposits at domestic offices only.

[11] IPC = Individuals, Partnerships, and Corporations.

[12] Super NOW accounts are NOW accounts containing an agreement between depositor and depository such that, provided certain conditions—including a $1,000 minimum balance—are met, some or all funds deposited are eligible to earn more that 5.25 percent.

[13] Non-transaction accounts include money market deposit accounts, savings deposits subject to restrictions of three withdrawals or transfers a month, savings deposits subject to no more than three transfers a month for purposes of covering overdrafts, other savings deposits not classified as transaction accounts, and all time deposits with original maturities of seven days or more that are not classified as transaction accounts.

[14] Interest income on funds invested by the state.

[15] Includes amnesty payments of $75 million in January 1985; $1 million in June 1985; $15 million in March 1986; and $11 million in April 1986.

[16] The state lottery began in July 1974.

[17] US, Chicago, and St. Louis are annual averages. Regional figures are for June of the year shown.

* Illinois portion only.

Note on Employment Data

Section 5 is the first of five sections of this book reporting employment data. Employment data in Sections 5, 6, 8, 9, and 10 may overlap. These data differ across sections of this volume due to differences in data collection methodology and coverage among the sources cited. Below is a short presentation comparing employment data in various sections of this volume. For more detailed explanations, consult the source documents.

There are three kinds of employment data included in this volume: (1) establishment, or payroll data; (2) household survey data; (3) and data compiled from the records of federal agencies such as the Internal Revenue Service.

Establishment data in Sections 5, 6, and 9 reflect payroll survey data which count a person with more than one job if his/her name appears on a payroll. The series includes military workers who hold civilian jobs during their off duty hours and inmates of institutions who are working inside or outside their institutions if they are included on the payroll. Establishment data have no age limitation, and do not include self-employed workers. This series collects data in the week containing the 12th of the month. Persons absent from work in a given week are counted as employed only if the worker is on paid leave.

The household survey data in Section 10 reflect a comprehensive interview process used to collect information. Included in the survey are persons 16 years or older employed in corporations, government, nonprofit organizations, self-employed, unpaid employees working more than 15 hours or more in family operated enterprises during the survey week, private household workers, members of the armed forces stationed in the US, and citizens of foreign countries temporarily employed in the US but not living in embassy premises. Inmates of correctional and mental institutions are not included in household data. Employed persons with more than one job are counted in the job in which they work the most hours. This series also collects data in the week containing the 12th of the month. Unlike the establishment data, household data count persons absent from work in a given week as employed.

Section 8 presents data on employment by industry and broad industrial source from the Department of Commerce, Bureau of Economic Analysis. These data are broken down into three categories: wage and salary employment, nonfarm proprietors, and farm proprietors. Estimates of wage and salary employment are derived from unemployment insurance records. Nonfarm proprietors employment for the US is estimated from Internal Revenue Service Schedule C and Form 1065, while state and regional estimates are derived from the number of firms with five or fewer proprietors filing IRS Form SE. Farm proprietors are derived from the US Department of Agriculture and benchmarked to the Census of Agriculture. Included here is the number of proprietors operating with gross receipts of over $1,000 per year.

When examining employment data, it is important to keep in mind the sources of the statistics and the differences inherent in the methodologies.

Introduction to Section 5

Section 5 presents selected series on manufacturing industries, by industry, for the State of Illinois. These data were extracted from the Census of Manufactures: Geographic Area Series, US Department of Commerce, Bureau of the Census. These documents should be consulted for details concerning definition of terms, sampling method, and scope of coverage.

This section covers manufacturing industries only. Hence, any references to all industries refers to all manufacturing industries.

The employment data in this section may overlap with data presented in sections 8 and 9, as noted above. However, all the employment data presented in this section are consistent.

For some series, the estimated data account for 10 percent or more of the data shown. These estimations differ by year and are not indicated in the tables. For details on this intricacy, consult the source documents.

Not all counties and statistical areas in Illinois are presented in the tables in this section. No data were available for the geographic areas that are missing.

The footnotes for this section are:

B	250-499 employees.
C	500-999 employees.
D	Withheld to avoid disclosure of confidential data.
E	1,000-2,499 employees.
(NA)	Data not available.
Z	Figure rounds to zero.

SECTION 6
SERVICE INDUSTRIES

This section presents selected series on the service industries in Illinois. These data were extracted from the Census of Selected Service Industries, US Department of Commerce, Bureau of the Census. Only establishments with a payroll are included in the tables.

The data presented in this section cover service industries only.

The employment data presented here may overlap with data presented in Sections 8 and 9. These data differ across sections of this volume due to differences in data collection methodology and coverage among the sources cited. See the introduction to Section 5 for a brief explanation of employment definitions and methodology. The employment data presented in this section are consistent with other data in this section.

Not all counties and statistical areas in Illinois are presented in the tables in this section. No data was available for the geographic areas that are missing.

The footnotes for this section are:

[1] Includes counties with 300 establishments or more.

[2] Includes counties with 500 establishments or more.

[3] Includes firms subject to federal income tax for counties with 300 establishments or more.

SECTION 8
EMPLOYMENT

This section presents data on employment by industry. While this data series overlaps some of the data in Sections 5, 6, 9, and 10, it has been included in this volume because it represents the most complete consistent employment series broken down by county and industry. See the introduction to Section 5 for a brief explanation of employment definitions and methodology. The employment data presented in this section are consistent with other data in this section.

These data were extracted from the series "employment by type and broad industrial source" published by the Bureau of Economic Analysis, US Department of Commerce.

The observations for 1969-74 are based on the 1967 SIC. Observations for 1975-84 are based on the 1972 SIC.

The footnotes for this section are:

[2]	Excludes limited partners.
[3]	Other—number of jobs held by US residents working for international organizations in the US.
(D)	Not shown to avoid disclosure of confidential information.
E	The estimate shown here constitutes the major portion of the true estimate.
(L)	Fewer than 10 jobs. Estimates are included in totals.
(NA)	Data not available.
*	Illinois portion only.

SECTION 9
EMPLOYMENT, HOURS, AND EARNINGS

This section presents data on employment, hours worked, and weekly earnings broken down by industry. The employment data presented here may overlap with some of the data presented in Sections 5, 6, 8, and 10. These data differ across sections of this volume due to differences in data collection methodology and coverage among the sources cited. See the introduction to Section 5 for a brief explanation of employment definitions and methodology. The employment data presented in this section are consistent with other data in this section.

These data were obtained from the BLS790 report on employment, hours, and earnings published by the Bureau of Labor Statistics, US Department of Labor. Their figures are derived from a monthly survey of approximately 13,000 establishments.

Not all counties and statistical areas in Illinois are presented in the tables in this section. No data were available for the geographic areas that are missing.

The footnotes for this section are:

SECTION 10
LABOR FORCE STATISTICS

This section presents data on the labor force, employment, unemployment, and the unemployment rate for geographical areas in Illinois. The employment data in this section may overlap with the data presented in Sections 8 and 9. All of the data in this section are consistent in coverage and methodology and are included to provide the derivation of the unemployment rate. These data differ from the data in other sections of this volume due to differences in data collection methods and coverage. For more information, see the brief summary on employment definitions and methodology included in the introduction to Section 5.

These data were obtained from the US Department of Labor, Bureau of Labor Statistics. They are compiled from the survey of approximately 60,000 households conducted by the Bureau of the Census.

The footnotes for this section are:

SECTION 11
POPULATION

This section presents data on population broken down by geographic areas, sex, age, race, and marital status as well as selected housing information. These data were extracted from the Census of Population and Housing, US Department of Commerce, Bureau of the Census.

The footnotes for this section are:

[1] Group quarters includes such items as dormitories and prisons.

[2] In 1970 the Asian and Pacific Islander category includes Japanese, Chinese, Filipino, Hawaiian, and Korean. The 1980 group includes these plus Asian Indian, Vietnamese, Guamanian, and Samoan. Thus, this category as well as the "other" category are not strictly comparable between 1970 and 1980.

* Illinois portion only.
